SPOTTED GUM
PREMIER DECKING™

Why Pentarch Forestry's Spotted Gum Decking?

Discover the warm and inviting charm of Spotted Gum today!

- Spotted Gum, a beautiful and versatile timber, showcases a soft mottled colour palette that ranges from pale grey browns and soft creams to captivating rich chocolate brown.
- Its natural variation adds depth and character to any space, making it a perfect choice for both contemporary and traditional designs.
- Timber decking is excellent for pool surrounds and as an alternative to concrete and paving materials in accordance with local building codes and install guide.
- Decking can be used to complement internal flooring and form a natural flow from indoors to outdoors.
- Hardwoods are easy to stain to complement an outdoor colour scheme or can be left raw to create a natural, weathered look.
- Durable hardwood timber decking is a natural product and can be refinished to its original state with little fuss.
- Seasoned to ensure optimum hardness, stability and long service life.
- A timber deck is built over the natural layout of the land so it will not interfere with drainage.

Technical Specifications

Properties	Spotted Gum
Natural Durability Class of Hardwood	Above Ground Dura 1
