TALLOWOOD  
PREMIER DECKING™

## Why Pentarch Forestry Tallowwood Decking?

Tallowwood is one of Australia's most durable and distinctive native hardwoods, highly regarded for its excellent performance in both internal and external applications.

- Tallowwood is predominantly yellowish brown in colour with a tinge of olive green and displays beautiful growth rings.
- Tallowwood's resistance to decay, insects, and weathering makes it an excellent choice for decking applications.
- Pentarch Forestry Tallowwood Decking is naturally fire resistant and suitable for use in BAL 19 areas under Australian Standard AS 3959.
- Tallowwood can be used for internal flooring and outdoor decking, to provide a seamless transition from inside to outside, expanding living areas or to create an outdoor room.
- Australian Hardwoods can easily be finished with a clear decking oil or stain. Alternatively, the timber can be left to weather to turn an attractive silver grey. After timber has weathered it can be restored to its original colour by resanding and coating.
- Australian hardwood species are naturally grown and sourced in Australia making them perfect for any Australian venue and the Australian climate.
- Pentarch Forestry solid hardwood products have full chain of custody certification which meets the Responsible Wood Standard AS 4707.

## Applications

### Decking

- Decks
- Screening
- Fences
- Gates
- Seating

## Standard Sizing

### Decking

86 x 19mm, 130 x 19mm

## Grades

Standard and Better

## Lengths

Random lengths 1500mm - 5700mm

## Technical Specification

Properties	Tallowwood
Natural Durability Class of Hardwood	Above Ground Dura 1
Strength Group Seasoned	SD2
Hardness Seasoned	Janka (kN) 8.6

Responsible Wood<sup>®</sup>

RW/1-31-217

PEFC<sup>™</sup>

PEFC/21-31-217

Sustainably Grown. Australian Made.

Note: Variations within a timber species are normal, therefore photographs, samples and displays can only be indicative of colour and should not be used for final selection. It is normal for natural timber products to react to changes in atmospheric and environmental conditions such as humidity and temperature.
